

Lincoln Institute of Land Policy

Program on the People's Republic of China

REQUEST FOR PROPOSALS

The Lincoln Institute of Land Policy Program on the People's Republic of China cordially invites proposals for academic papers addressing land, urban, fiscal, and environmental related issues in China. Five focus areas are indicated below:

1. **Land Market Development.** This area focuses on land markets in Chinese urban areas and international experiences of effective and efficient land use management and regulations.

- In terms of property rights, how have private property rights evolved in terms of the application of leasehold tenure, the definition of property rights associated with leasehold, the changes in the length of leasehold terms and the reasons for this, and evidence on how and whether property values are affected by the length of leaseholds and the details of property rights?
- What is the role of user charges versus other revenue instruments in financing various kinds of public infrastructure and services?
- In terms of urban expansion what role have land prices played in urban expansion? Is there more expansion in areas where urban prices are high? Case studies of urban expansion are also of interest.
- In terms of resource allocation, what is the magnitude of land price's role in affecting the use of the land?
- What is the linkage if any between the land use and housing market development? What role does the land market and land prices play in urban housing prices?
- Comparative studies or international experiences of land management laws, regulations and policies that may be applicable for the improvement of land use management and farmland preservation in China.

2. **Urban Planning, Development, and Housing.** This area focuses on the role of planning and market forces as determinants of urban development and housing.

- In terms of planning, what is the relationship between planning and urban development?
- What are the characteristics of China's urban form as compared to other countries? Is there evidence of urban sprawl among Chinese cities? What are the international practices that may be introduced to improve current urban and land planning in China and promote low-carbon urban development?
- What is the relationship between planning and urban housing? What is the relationship between land supply and housing prices?
- What is the best way to measure the health of China's housing markets? What are the current situations of aggregate demand and supply of housing? Is there any empirical evidence that may be of significance to a better understanding of housing markets in urban china?
- What are the roles played by planning in the provision of affordable housing to the middle to low income groups? What can we learn from international practices to promote affordable housing in China and what policies shall be adopted to reflect such experiences?
- How effective is the infrastructure investment in stimulating economic development and employment? What is the outcome of Chinese infrastructure investment projects and policy implication?

3. **Land, Property Tax, and Local Public Finance.** This area focuses on the costs of public services and the revenue sources to pay for them.

- What is the role of revenue from taxes, land lease, user charges, and other revenue instruments in financing various kinds of public infrastructure and services, and local economic development?
- What is the theoretical framework for establishing a modern property tax system in China? What international experiences related to property tax can be applied to China, including system design and assessment techniques?
- What scope is there for local governments and municipalities to levy local taxes that can be used to finance local public goods? Is there any fiscal competition among jurisdictions in China?
- Is there any evidence on regional disparities in levels and qualities of local public services? How to restructure tax and expenditure assignments among different levels of government to promote the equalization of public goods and services and fiscal accountability? How has the intergovernmental relationship in China evolved over the past 30 years and what impacts has the changing government finance structure had on land and housing markets and local economic developments?

4. **Urban Development and the Poor.**

- How have low income households been affected by the strengthening of market forces in the land market?
- How do urban housing markets provide housing for the urban poor and for recent rural migrants?
- How have changes in employment location affected the access to jobs by the urban poor?
- Which level of government (central vs. local) should take the main responsibility for the fiscal expenditures needed to provide low-income housing, and why?
- What is the best way to ensure that local governments have the right incentives to supply land and housing for the poor?
- What are the best options for enhancing the accessibility of employment, transportation, and public services for the urban poor, in an effort to reduce their transportation burden and improve their overall welfare?

5. **Climate Change and Urban Sustainability**

- How can China “green” its tax base? What are the best ways to utilize environmental taxes and fees and what impact will they have on China’s economic growth, urban development, and environment?
- How do different urban spatial structures and industrial development patterns affect cities’ environmental footprints and sustainability?
- What does climate change and international mitigation efforts mean for urban development and urban planning in China?
- How can cities be designed to be more ecologically resilient and environmentally sustainable while still meeting the economic, employment, and social demands of residents?
- What roll do cities have to play in meeting China’s commitment of reducing its carbon intensity per unit of GDP by 40-45 by 2020?

PROPOSAL REQUIREMENTS:

1. **Cover Sheet** (include name, title, organization, contact information, email, co-author or research collaborator information)
2. **Project Abstract** (Project title, abstract should not exceed 150 words)
3. **Table of Contents**
4. **Calendar of Activities**
5. **Detailed Budget** (Please outline costs for research assistance, equipment, data, fieldwork, travel, etc.)

6. Project Description

- a) Research objective and specific research question
- b) Theoretical or conceptual framework and main hypothesis to be tested
- c) Methodology, sources of empirical data, and data collection strategy
- d) Expected results
- e) Description of partnerships (if research involves collaboration with academic institutions, government organizations, private sector, etc.)

Proposals will be evaluated on the basis of significance, clarity, theoretical/conceptual framework, methodology, feasibility, and expected contribution to the field. Exceptional papers will be considered for inclusion in the Lincoln Institute Working Paper series.

TIMELINE FOR PROPOSALS AND PRESENTATION:

Deadline for Submission of Full Proposals – November 15, 2011

Deadline for Submission of Final Paper – September 30, 2012

AWARD AMOUNT

Awards range between \$25,000 to \$30,000 USD.

Work-for-hire

The funds awarded under this Request for Proposals are contracted as work-for-hire and are not allowed to be sub-contracted by recipients to third parties.

Electronic submissions are encouraged in PDF or Postscript format. Send all submissions to:

Lincoln Institute of Land Policy

113 Brattle Street
