

## Acknowledgements

On behalf of the Lincoln Institute of Land Policy/Sonoran Institute Joint Venture on State Trust Lands, the authors wish to recognize a number of individuals and organizations for their support and assistance with the development of this report. Dr. Sally Fairfax and Dr. Jon Souder provided initial guidance to this effort and helped to get the research off the ground; in addition, their book, *State Trust Lands: History, Management, and Sustainable Use*, which remains the definitive source for the unquestioned founding text on state trust lands, was invaluable at every turn.

Staff members from the various trust management agencies addressed in this report shared their time, enthusiasm, and information with our research team as the project moved forward. Although these individuals are too numerous to list, we wish to recognize in particular the staff of the Arizona State Land Department, Colorado State Land Board, Idaho Department of Lands, Montana Department of Natural Resources and Conservation, New Mexico State Land Office, Oregon Department of State Lands, Utah State and Institutional Trust Lands Administration, Washington Department of Natural Resources, and the Wyoming Office of State Lands and Investments, whose agencies became the focus of the report and who provided the essential information about the nuances of their states' administration of trust lands for the completion of the report.

The Joint Venture's State Trust Lands Research Roundtable reviewed the first draft of the report and developed the recommendations related to opportunities for research and policy investment that comprise section VI. Members of the Roundtable included Charles Bedford, Associate Director of The Nature Conservancy of Colorado; Brian Boyle, former Commissioner of Public Lands for the State of Washington; Lynne Boomgaarden, Director of the Wyoming Office of State Lands and Investments; Kevin Carter, Director of the Utah School and Institutional Trust Lands Administration; Dr. Carol Heim, Professor of Economics at the University of Massachusetts at Amherst; Dr. Mark Muro, Senior Policy Analyst for the Metropolitan Policy Program at the Brookings Institution; Dr. Jon Souder, Executive Director of the Coos Watershed Association; Mark Winkleman, Commissioner of the Arizona State Land Department; Dr. Steven Yaffee, Professor of Ecosystem Management and Director of the Ecosystem Management Initiative for the University of Michigan; Dr. Armando Carbonell, Senior Fellow at the Lincoln Institute of Land Policy; Katie Lincoln with the Lincoln Foundation; and Luther Propst with the Sonoran Institute.

We are grateful to a number of individuals for taking the time to review and comment on the final draft and ensure the factual accuracy of key sections of the report, particularly the sections relevant to their states: Arizona State Land Commissioner Mark Winkleman and Richard Oxford, Director of the Land Information, Title and Transfer Division of the Arizona State Land Department; Director Winston Wiggins of the Idaho Department of Lands; Tom Schultz, Director of the Trust Lands Management Division of the Montana Department of Natural Resources, and Jeanne Holmgren, Real Estate Management Bureau Chief of the Trust Lands Management Division of the Montana Department of Natural Resources; Public Relations Specialist Michael Bowers and Steve Hughes of the Legal Division of the New Mexico State Land Office; Jeff Kroft, Senior Policy Specialist and Hearing Officer, and John Lilly, Assistant Director of Policy and Planning of the Oregon Department of State Lands; Kevin Carter, Director, and Ron Carlson, Audit Manager of the State and Institutional Trust Lands Administration; Bonnie Bunning, Executive Director of Policy and Administration, and Andrea Grimes, Executive Assistant to the Executive Director of Policy and Administration of the Washington Department of Natural Resources; and Director Lynne Boomgaarden of the Wyoming Office of State Lands and Investments.

Particular thanks is owed to Jon Souder, who engaged in a comprehensive review of the final draft of the report; his comments were essential to finalizing the report, completing the legal analysis, and helping to restore the vision of the overall project. We are also indebted to Dr. Jay O'Laughlin of the University of Idaho, who provided invaluable and detailed comments to complete the legal analysis; thanks also to Professor Mary Wood of the University of Oregon School of Law in this regard. Andy Laurenzi, Director of the State Trust Lands Program for the Sonoran Institute, also provided invaluable review and guidance from the preparation and throughout the various drafts of the report.

Finally, a deep debt of gratitude is owed to Jennifer A. Barefoot of the Sonoran Institute's Phoenix office, who spent countless hours reviewing and editing this report to bring it into its final form.

### ***About the Authors***

**Peter W. Culp** is the Project Manager for the State Trust Lands Program and Attorney for Programs for the Sonoran Institute, where he works on a variety of issues related to land and water policy. He is the author of four published articles and several unpublished reports on environmental policy in the Colorado and Columbia River basins. He holds a J.D. from the University of Arizona (*summa cum laude*, 2001) and a B.A. in politics from the University of California, Santa Cruz (*with honors*, 1994). He is a member of the State Bar of Arizona and the American Bar Association.

**Diane B. Conradi** is the Montana Project Manager for the Sonoran Institute's State Trust Lands Program, where she manages a variety of policy efforts related to the administration and management of state trust lands in Montana. She holds a J.D. from the University of Oregon (1991) and a B.A. in English from University of South Carolina Honors College (*with honors*, 1986). She is a member of the Oregon State Bar and the State Bar of Montana.

**Cynthia C. Tuell** is a second year law student at the James E. Rogers College of Law, University of Arizona, and is Senior Intern for the Sonoran Institute, where she conducts research on a variety of issues related to the administration and management of state trust lands. She holds a B.S. in Ecology and Evolutionary Biology from the University of Arizona (*cum laude*, 2002).
