

## Jeffrey Allenby

### **Director, Conservation Technology at Chesapeake Conservancy**

Jeffrey Allenby is the Director of Conservation Technology at Chesapeake Conservancy. His team explores new methods to improve the effectiveness and efficiency of the Conservancy's conservation and restoration programs and focuses on developing ways to empower partner organizations. Before joining the Conservancy, Jeff worked with the University of Maryland Center for Environmental Science and the Maryland Department of Natural Resources, managing a grant program focused on local governments' response to climate change and coastal hazards, and at the Chesapeake Bay Foundation. Jeff has a Masters in Environmental Management and Certificate in Geospatial Analysis from Duke University and a BS from University of Richmond.
